## Three columns

Memory is not a filing cabinet. The daemon keeps every entry with the episode that wrote it, ranks what it finds by meaning rather than by spelling, and lets a newer fact supersede an older one without deleting the history. Office workflows, efficient affinity, fluffy waffles and difficult official offices exercise ligatures; AVATAR, WAVE, Toyota and LTA exercise kerning pairs. Memory is not a filing cabinet. The daemon keeps every entry with the episode that wrote it, ranks what it finds by meaning rather than by spelling, and lets a newer fact supersede an older one without deleting the history.
